

JOHN HENRY NEWMAN ACADEMY MFL Vision & Principles

Our school's vision and principles for MFL

At JHNA, we believe that it is vital to create enthusiasm and excitement around language learning for children to make 'substantial progress' in the subject. It is the intention that all children will access first quality teaching of Spanish in order to adequately prepare them for Key Stage 3. Our Key Stage 1 children will also access Spanish through engaging activities later in the year. Children are exposed to a variety of different languages and cultures which enables our children to access the wider curriculum and prepares them to be a global citizen now and in their future roles within a community. We believe children should be immersed in the language by listening and engaging with each other using subject specific vocabulary. We will provide an MFL Curriculum which develops learning and results in the acquisition of knowledge and skills which enables children to access the wider curriculum and to prepare children to be a global citizen now and in their future roles within a global community.

MFL teaching and learning at JHN is good when;

it is interactive.

we are learning vocabulary we can use in everyday life.

we are learning about different cultures.

we can talk in other languages with our peers.

we are sharing our learning with others.
